**Applicant(s)**

BRAUER ET AL.

**Examiner**

JERRY REDMAN

**Art Unit**

3634

**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 08 April 2011.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☒ Other: approved replacement drawings

The status of the claims is as follows:

Claim 4 has been cancelled; and

Claims 1-3 and 5-16 are herein addressed below.

The replacement drawings dated 4/8/2011 have been approved by the Examiner.

The applicant's substitute specification dated 9/29/2006 has been approved by the Examiner.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5, 8-12, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Shimizu (6,758,012 B2). As shown in detail below, Shimizu (6,758,012 B2) discloses a vehicle having a vehicle door (column 3, line 14, i.e.,) having a module (all inner mechanisms of a vehicle door), a carrier part (24) integrally formed with a drum housing (24a) having side walls, a back wall having a thrust bearing integrally formed thereon, and the housing (24a) having a first diameter area (see Figure below) and a second diameter area larger than the first diameter area (see Figure below).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 7, 13, 14, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimizu (6,758,012 B2). Shimizu (6,758,012 B2) fails to disclose the first and second diameter areas to be 35 to 65mm and 20 to 40mm respectively and relative proportions of the first and second areas. With respect to claims 6 and 13, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide the first and second areas to be 35 to 65mm and 20 to 40mm respectively since

the dimensions are a matter of design choice and the drum housing having these dimensions would operate equally as well. Furthermore, it would have been a matter of design choice to provide such tolerances within the automobile industry and specifically within a vehicle door having a cable housing. With respect to claims 7, 14, and 16, it would have been further obvious to one of ordinary skill in the art at the time of the invention to provide to adjust the two heights to accommodate different size cable drums of a motor vehicle and the housing of Shimizu (6,758,012 B2) would operate equally as well when the areas within the housing are adjusted.

Applicant's arguments with respect to claims 1-3 and 5-16 have been considered but are not deemed persuasive. It appears that the applicant's arguments are more limiting than that of the claims. The newly added language via the current amendments dated 4/8/2011 fails to read over the art of record and specifically, fails to be positively recited thus carries little to no patentable weight. The applicant should feel free to contact Examiner to help move the application towards condition for allowance.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerry Redman whose telephone number is 571-272-6835. The examiner can normally be reached on M-TH from 8 to 6.
